

# Hannover 96

The club sports center offers a 96-sports home, with digital fitness and health facilities, a course and functional space, two modern sports halls, diverse outdoor facilities, the club sports restaurant "96 stamme" and the office

## General

Hannover 96 reacts with the club sports center on the department's overall capacity bottlenecks in sports fields and on the developments of the sport. Increased health awareness, new training methods and digitization are factors influencing people's understanding of sports. Above all, maintaining health plays a central role. The club sports center is also a family center in which all family members find old and needs-based offers and can do sports in parallel. From baby to seniors all find a sporting home at the Stadionsbrücke. Of course, the center will be barrier-free.

## Ground floor

On the ground floor of the building are the sports rooms for the various offers of the departments. For the strongly in demand offers in the children and adults area of the fit and Kids department further capacities are created. New integrated movement landscapes of a children's sports school for a broad motor basic training of children without early and one-sided specialization. In the larger sports hall, which can be divided into two sections by a mobile curtain, team and ball sports such as basketball, floor ball, table tennis, football, basketball and so on can be offered.

## 1st floor

In the administrative area, the employees, which were previously spread over several offices in the city area, are brought together. In addition to the association administration, the employees also work here for sports operations in and outside the club sports center

## 2nd floor

A fitness and health studio with a focus on prevention and rehabilitation is being established on the upper floor of the three-storey building. Here you will find a device area a lot of strength and endurance training and two sports rooms for fitness and rehabilitation courses. Optionally, the terrace can be used on the roof of the two bustling part of the building.
