

German week

We could hardly wait for the german exchange week. It was very exciting with the many positive impressions. I really enjoyed the week. We have experienced a lot together and laughed a lot.

The german exchange week was a kind of experiment in english for me and my family. Sometimes it was also very funny how my mother tried to explain something with broken english. We have done something every day. For example we were eating chinese and were in Superfly also played a bit Nintendo switch at my home it was fun.

I still have contact with both of them and write with both regularly maybe my host student will come to me in summer then we will both have a lot of fun in summer in Hannover.

My visit to Norway has fascinated me very much the landscape and the people are very open and very nice. I would imagine even emigrating to Norway.

Nevertheless, I can only recommend it to everyone to improve their language skills, get to know new cultures and develop themselves personally.

In any case, this was an adventure of my life. I am very grateful to Frau Lampe and Herr Kahlert for having included me in the Erasmus Plus Project.
